

Boat Bag

How can your child play with boats without even getting wet? Pour a bottle of hair gel and blue food-dye into a Ziploc bag. Drop in a few small boat, jet ski, surfboard or any type of water transportation erasers or stickers into the bag. Seal the bag and use packing tape around the opening to make sure the bag is securely closed. Now, your child can use their fingers to squish the bag and move the boats, surfboards and other water vehicles through the water, staying dry the whole time!
