

Bubble Foam

It's May and time to bring out the kiddie pools! For fun, instead of filling it with water, create bubble foam for your child to play in! Simply mix 2 parts water with 1 part bubble bath (tear-free is suggested) with a hand mixer. You can make small batches, such as 2 cups of water with 1 cup of bubble bath, and add in different drops of food coloring to make a rainbow of colors. As each batch is whipped up, pour them in the pool! Add in some of your child's favorite small toys or some measuring cups and spoons and let the fun, and the foam, begin!
