

Do you want to build a snowman?

A fun winter activity is to build a snowman... indoors!! Tape a large piece of contact paper to a wall in your home and use a sharpie to draw the outline of a snowman! Cut out a carrot nose and some black dots (pieces of coal) for a mouth, and get some googly eyes from your local Dollar Store! Then, find any buttons you may have on hand and a bag or two of cotton balls. Now, you have the makings for a sticky snowman! Your child can stick all of these items to build a snowman in the comfort and warmth of their own home!
