

## Driving Through Town

If the weather is nice, draw a roadway on your driveway or sidewalk with sidewalk chalk. If it's too cold or raining, use painters' tape on the floor in your home. Make roads that zig-zag, are straight, and make circles, all through the town. Let your child use blocks, paper towel rolls, or any other materials they choose to create ramps, tunnels, and bridges for their toy cars and trucks to get over, under, and through! Their toy cars and their imagination will be driving through town all day!
