

**Have some fun with your family all through the house
with these activities picked just for you!**

In the living room: Put out a family fun puzzle out on the coffee table and the whole family can help put it together!

In the bedroom: In your child's bedroom, place lunch-size paper bags, markers or crayons, different colored yarn, and glue on the floor. Every member of the family can make a puppet that looks like them. Your child can keep the puppets in their room and play with their family anytime they like!

In the kitchen: Who's hungry for homemade pizza?? Take refrigerated pizza dough and help your child roll it out on a pizza pan. The whole family can then add their favorite toppings. Marinara sauce, cheese, pepperonis, and more! While the pizza bakes in the oven, someone can set the table while another family member gets the drinks. Ding!! Pizza is served!

In parent's bedroom: The whole family can snuggle up in the big bed and read their favorite stories! Each member of the family gets to choose one book for everyone to listen to!

On the porch: Whether your home has front or back porch or even a balcony if you live in an apartment, these spaces will look much prettier with some pretty flowers! Your local Dollar Store has everything you need for each family member to plant some flowers. Small containers, potting soil, and some flower seeds are all you need! Remind everyone to take turns watering the flowers every day!

All through the house: Pick a home base and have one family member close their eyes and count to 10. Everyone else goes somewhere in the house and hides. Each family member will try and make it back to home base but if the counter finds them first, then they become the counter and everyone else gets to hide!
