

Fireworks for the 4th!

Help your child create their own safe fireworks for the 4th of the July! Take a few toilet paper rolls and cut 2-inch long fringes at the bottom of each roll. Lay the fringes out so they lay flat on the table. Pour red, blue, or any colors your child likes onto individual paper plates. Have your child dip the fringe into the different colors of paint and stamp them onto paper. Sprinkle on some glitter and your child has their own fireworks show to showcase all over the house!
