

Giant Bubbles

Fill a kiddie pool with water and a cup or two of dishwashing soap (Dawn seems to work the best). Your child can use a variety of bubble blowers you can get from your local Dollar store but you will need a hula hoop to make giant bubbles! Lay the hula hoop into the soapy water and have your child step in the middle of the hula hoop. Then, slowly start lifting the hula hoop out of the water and a giant bubble will enclose your child until it pops!
