

Easy Mother's Day Gift Idea – Photo Magnets

What you will need:

- 1 Lid per child
- Construction Paper
- Paper or craft foam
- Magnets-(if you have some old ones from businesses you can recycle them)
- Scissors
- Glue
- Camera

Any size lid will work (pickle jars work great)

Take photos of your students and have them printed.

Have students trace around the lid in the area they want to cut out

Pre make one of each petal and cut them out for each student. Let them use these as guides and have them trace out their petals. Or for quicker craft making have all the petals pre-cut.

Glue the petals to the outside of the lid.

Cut the magnets to fit the outside of the lid as shown above.

Give them a test run to make sure they stay
