

Spring (fine-motor) Flowers!

Help your child strengthen their fine-motor skills while creating a beautiful flower arrangement! You will need a colander, some bunches of artificial flowers, and floral foam in the shape of a half-circle. Turn the colander upside down and place it over the floral foam. Then, tell your child to place the stems of the flowers into the holes in the colander in whatever pattern they choose. Your child will have a fun, and challenging, time placing the flowers into the holes and making sure they stay put in the foam. They will also be creating a beautiful flower arrangement for their home. The best part is that they can take the flowers out and make a new arrangement any time they like!
