

What Will I Be When I Grow Up? **Science, Math, & More**

It's never too early to start thinking about your future, and this book will introduce some cool careers in the fields of science, math, and more! The pictures in this book beg to be played with, so why not have some fun with them? Find some photographs of your child where their face is obvious. Cut just their faces out of the pictures (make sure you have backup copies for your photo album!). After reading the story, tape your child's face over the faces of the characters. Now, when you reread the story, look who the astronaut is... your child! Who is the lawyer? Your child! What a way to bring your child's career dreams to life when they actually see themselves in the different roles!
