

Water Bottle Watering Can

Materials Needed:

- Empty Plastic Water Bottle
- Push Pin
- Stickers (as many as you desire!)

Instructions:

- Clean out an empty plastic water bottle (make sure the sticker that is wrapped around the bottle is peeled off)
- Using your stickers, cover your water bottle with as many as you desire!
- Add holes to the top of your water bottle using a push pin (add 8-10 holes)
- Now your water bottle watering can is ready to use!

To Use:

Fill the bottle with water- make sure the water does not go above the holes you made at the top of your water bottle.

Put the water bottle cap on and tip the bottle so the water goes out through the holes- squeeze the bottle to help the water come out!
